OILQUICK BENEFITS

FAST AND EFFICIENT

The OilQuick quick coupler system enables the operator to change over quickly between various mechanical and hydraulic attachments from inside the cab. Have the right tool for the job in every situation, so you can work faster and more efficiently.

HIGHEST QUALITY

OilQuick quick couplers and tool adapters are of the highest quality and ensure a precision fit. The coupler locks the attachments in place at full system pressure. This ensures engagement with no play resulting in minimum wear and long service life for the coupler system.

SAFE QUICK COUPLER SYSTEM

OilQuick quick coupler systems are safe and secure. Safety features include double hose break valves and a system for constantly re-adjusting the locking bolts hydraulically. The locking is operated via a pressure panel or touch screen.

IMPROVED WORKING CONDITIONS

As work tools are changed and coupled automatically, the operator does not have to get out of the cab. No more handling of couplings covered in oil or leaving the cab with unnecessary exposure to risks. OilQuick boosts morale at work, even in poor weather conditions.

MORE COST EFFECTIVE

Fast tool change and efficient use of the excavator help to increase productivity. Experience has shown that investing in an OilQuick quick coupler pays off when you are changing hydraulic work tools two or more times within a working day.

ECO-FRIENDLY

All OilQuick quick couplers are fitted with leak-free oil quick couplings.

CLEAN SYSTEM PARTNER

A certified partner program to protect the users and create confidence in our trade partners.

MANUFACTURED IN THE USA

In partnership with OilQuick AB, OilQuick Americas started manufacturing automatic couplers and brackets at our 120,000 square foot facility in Superior, Wisconsin USA in 2022.
